

COURSE SYLLABUS						
Cours e Code	COMP 018	Course Title	Database Administration		Course Credit	3
Course Description		This course discusses basic concepts on database administration. It includes discussions how SQL is used to enforce database security, ensure database availability, and optimize database performance. This course builds student knowledge in coding advance SQL and integrates it with the knowledge learned from the pre-requisite subject to develop an application which fully utilizes the capabilities of a database management system.				
Pre-Requisites			Co-Requisites	None		
VISION		A Leading Comprehensive Polytechnic University in Asia				
MISSION		Advance an inclusive, equitable, and globally relevant polytechnic education towards national development.				
QUALITY POLICY STATEMENT		The Polytechnic University of the Philippines commits to provide inclusive and equitable quality education and promote lifelong learning opportunities for human advancement and social transformation through re-engineered polytechnic academic programs. Toward this end, we, the members of the PUP Community will vigorously and steadfastly endeavor to continuously improve the standard of University services to the satisfaction of our clients through the adoption and continuous review of our Quality Management System.

**INSTITUTIONAL
LEARNING OUTCOMES
(ILO)**

- As a polytechnic state university, PUP shall develop its students to possess:
1. **Critical and Creative Thinking.** Graduates use their rational and reflective thinking as well as innovative abilities to life situations in order to push boundaries, realize possibilities, and deepen their interdisciplinary, multidisciplinary, and/or transdisciplinary understanding of the world.
 2. **Effective Communication.** Graduates apply the four macro skills in communication (reading, writing, listening, and speaking), through conventional and digital means, and are able to use these skills in solving problems, making decisions, and articulating thoughts when engaging with people in various circumstances.
 3. **Strong Service Orientation.** Graduates exemplify strong commitment to service excellence for the people, the clientele, industry, and other sectors.
 4. **Adept and Responsible Use or Development of Technology.** Graduates demonstrate optimized and responsible use of state- of-the-art technologies of their profession. They possess digital learning abilities, including technical, numerical, and/or technopreneurial skills.
 5. **Passion for Lifelong Learning.** Graduates perform and function in society by taking responsibility in their quest for further improvement through lifelong learning.
 6. **Leadership and Organizational Skills.** Graduates assume leadership roles and become leading professionals in their respective disciplines by equipping them with appropriate organizational skills.
 7. **Personal and Professional Ethics.** Graduates manifest integrity and adherence to moral and ethical principles in their personal and professional circumstances.
 8. **Resilience and Agility.** Graduates demonstrate flexibility and the growth mindset to adapt and thrive in the volatile, uncertain, complex and ambiguous (VUCA) environment.
 9. **National and Global Responsiveness.** Graduates exhibit a deep sense of nationalism as it complements the need to live as part of the global community where diversity is respected. They promote and fulfill various advocacies for human and social development.

	Leadership and Organizational Skills. Graduates assume leadership roles and become leading professionals in their respective disciplines by equipping them with appropriate organizational skills. Personal and Professional Ethics. Graduates manifest integrity and adherence to moral and ethical principles in their personal and professional circumstances. Resilience and Agility. Graduates demonstrate flexibility and the growth mindset to adapt and thrive in the volatile, uncertain, complex and ambiguous (VUCA) environment. National and Global Responsiveness. Graduates exhibit a deep sense of nationalism as it complements the need to live as part of the global community where diversity is respected. They promote and fulfill various advocacies for human and social development.
COLLEGE GOALS AND OBJECTIVES	The Polytechnic University of the Philippines – Taguig Campus aims to achieve the following goals: - Offer curricula which are relevant and responsive to the changing needs of the industry and society; - Provide trainings to students that will enable them to become potent instruments to socio-economic development. - Prepare students to become productive, creative, innovative, and dynamic in their chosen fields of specialization. - Provide state-of-the-arts facilities of learning to optimize student development; - Inculcate appropriate values that are necessary to build a humane, disciplined, nationalist, and independent society; - Tap potentials of students, faculty, administrative staff and other stakeholders in formulating policies for institutional development; - Involve all stakeholders in enhancing programs for student’s faculty and employees’ development; - Partner with industry and other research institutions strengthening research capabilities of faculty, employees and students; - Facilitate presentation of research outputs in international fora, and their publication in recognized journals; - Undertake outreach and research-based extension programs by tapping the expertise and other resources of all stakeholders and, - Produce technologies for commercialization of livelihood improvement.

PROGRAM LEARNING OUTCOMES (PLO)	Based on CMO	Alignment to ILOs								
		1	2	3	4	5	6	7	8	9
	Apply knowledge of computing, science, and mathematics appropriate to the discipline.									
	Analyze complex problems, and identify and define the computing requirements appropriate to its solution									
	Identify and analyze user needs and take them into account in the selection, creation, evaluation and administration of computer-based systems.									
	Design, implement, and evaluate computer-based systems, processes, components, or programs to meet desired needs and requirements under various constraints.									
	Integrate IT-based solutions into the user environment effectively.									
	Assist in the creation of an effective IT project plan.									
	Apply knowledge through the use of current techniques, skills, tools and practices necessary for the IT profession									
	Understand best practices and standards and their applications.									
	Function effectively as a member or leader of a development team recognizing the different roles within a team to accomplish a common goal.									
	Communicate effectively with the computing community and with society at large about complex computing activities through logical writing, presentations, and clear instructions.									
	Analyze the local and global impact of computing information technology or organizations, and society.									
	Understand professional, ethical, legal, security and social issues and responsibilities.

COURSE LEARNING OUTCOMES (CLO)		Alignment to PLOs							
		1	2	3	4	5	6	7	8
	- Analyze real life business problem, while dissecting the root cause of the problem. - Evaluate database needs of a group and formulate recommendations based on principles in database design.								
	- Document data gathered in every step of the process. - Create reports on progress updates. - Create project presentations on the application								
	- Perform tasks, depending on the role assignment - Contribute expertise to other members of the team. - Solve problems, whether technical and or non-technical issues that may arise.								
	Design and develop applications that will benefit the community								
	Design and develop efficiently running applications								
	Write advance SQL statements that will maintain data integrity and manage the database system								
	Plan knowledge sharing with the team for lessons which will be applied in the development of the database application.								
	Perform the role of a leader and organize the team so that each member will be able to maximize his full potential								
	Design database applications which will be useful or beneficial to the stakeholders								
	Design database applications which will be useful or beneficial to the community

DEBUTS AT 1501+

3-5	• Create program codes using basic SQL structure using single table • Create program codes using other DML, DDL commands • Explain when and what aggregate functions to use • Identify appropriate scalar function to use to simplify a program requirement • Test program codes to ensure they meet the requirements	Structured Query Language • Classifications of SQL Commands • Command Syntax of SQL Commands • Column and Scalar Functions	• SQL lecture with lab demo • Hands-on coding in lab PCs • Guided exercise using sample DB	• Recorded lecture with coding walkthrough • SQL practice via online sandbox (db-fiddle, replit) • Forum-based Q&A	• Written quiz and SQL coding output	• Timed quiz via LMS and code submission				
-----	---	---	--	--	--	--	--	--	--	--

6	• Explain the use and importance of integrity constraints • Determine how to enforce integrity constraints in program codes • Create tables following the rules of integrity constraints • Ensure that table design is optimal i.e. proper data type/size is assigned to fields • Create program codes which show how data manipulation is cascaded on the basis of referential integrity constraints	• Application of Integrity Constraints	• Instructor demo with SQL Server • Pair programming on FK constraints • Peer review of code	• Virtual lab using SQL Server Management Studio (SSMS) via screen share • Group collaboration on Google Docs for code review	• In-lab evaluation of constraint code	• Upload of code and screenshots via LMS				
7-8	• Create complex program codes using specific commands for multiple table processing	• Multiple Table Processing INNER/OUTER JOIN UNION/INTERSECT/ EXCEPT	• Lecture + whiteboard query flow diagrams • SQL lab sessions with real datasets	• Interactive query simulations • Online SQL trainer tool • Group coding in shared repository	• Live coding	• Group				

	- Specifically use JOIN as join predicate and differentiate it from WHERE as a join predicate - Process multiple tables using UNION/INTERSECT/EXCEPT - Test program codes to ensure they meet the requirements

THE COUNTRY'S 1st POLYTECHNICU

The instructor may not be able to remind all students about their missing/unsubmitted requirements. If at the end of the course students still have missing requirements, the instructor will compute for the final grade without those submissions (They will be graded with 0) and submit the grade. If the final grade is "INC" grade, the student must contact the instructor to decide in completing the course, ASAP.

d. Confer with classmates or the instructor about the discussions during the synchronous sessions that they missed if unable to attend the live sessions. Recordings will be provided but may not be available immediately.

e. Inform the instructor of concerns that may prevent them from fully participating in the class. This includes withdrawal from the course, long term illnesses, personal matters, and others. Teachers will not be able to help you if you don't tell them of these concerns.

Attendance.
We recognize that students have varying access levels to technology and connectivity, which is why for the most part, the course is conducted asynchronously. During synchronous sessions, there will be no checking of attendance. However, everyone is encouraged to participate in these sessions. A recording and/or transcript of synchronous classes will be made available for students who are unable to attend a synchronous session.

Late Submissions.
Deadlines will be set for the submission of course requirements. This allows the instructor sufficient time to review them. It also helps students pace their work. If you experience problems submitting your work on time, please contact the instructor ahead of time. All requirements must be completed to pass the course. Late submissions will not merit deductions but may not receive timely feedback.

Cheating and Plagiarism.
Any work submitted by a student in this course for academic credit will be the student's own work. Any form of academic dishonesty will be fully dealt with according to the stipulations of the PUP Student Handbook.

Participation.
Participation during discussions is greatly encouraged, and students should feel free to ask questions when an idea or lesson is unclear or confusing, especially during synchronous sessions.

Announcements.
Class announcements will be communicated through the class p
coursed through university-issued (i.e., official) email accounts. Stu
