

COURSE SYLLABUS						
Course Code	ELEC IT-FE1 COMP 11	Course Title	BSIT Free Elective 1 – Technical Documentation		Course Credit	3
Course Description		This course covers the principles, processes, and tools for creating clear, user-centered technical documents, emphasizing professional standards, document design, ethics, and digital collaboration.				
Pre-Requisites			Co-Requisites	None		
VISION		A Leading Comprehensive Polytechnic University in Asia				
MISSION		Advance an inclusive, equitable, and globally relevant polytechnic education towards national development.				
QUALITY POLICY STATEMENT		The Polytechnic University of the Philippines commits to provide inclusive and equitable quality education and promote lifelong learning opportunities for human advancement and social transformation through re-engineered polytechnic academic programs. Toward this end, we, the members of the PUP Community will vigorously and steadfastly endeavor to continuously improve the standard of University services to the satisfaction of our clients through the adoption and continuous review of our Quality Management System.				
INSTITUTIONAL LEARNING OUTCOMES (ILO)		As a polytechnic state university, PUP shall develop its students to possess: Critical and Creative Thinking. Graduates use their rational and reflective thinking as well as innovative abilities to life situations in order to push boundaries, realize possibilities, and deepen their interdisciplinary, multidisciplinary, and/or transdisciplinary understanding of the world. Effective Communication. Graduates apply the four macro skills in communication (reading, writing, listening, and speaking), through conventional and digital means, and are able to use these skills in solving problems, making decisions, and articulating thoughts when engaging with people in various circumstances. Strong Service Orientation. Graduates exemplify strong commitment to service excellence for the people, the clientele, industry, and other sectors. Adept and Responsible Use or Development of Technology. Graduates demonstrate optimized and responsible use of state-of-the-art technologies of their profession. They possess digital learning abilities, including technical, numerical, and/or technopreneurial skills. Passion for Lifelong Learning. Graduates perform and function in society by taking responsibility in their quest for further improvement through lifelong learning.				
2025 						

	6. Leadership and Organizational Skills. Graduates assume leadership roles and become leading professionals in their respective disciplines by equipping them with appropriate organizational skills. 7. Personal and Professional Ethics. Graduates manifest integrity and adherence to moral and ethical principles in their personal and professional circumstances. 8. Resilience and Agility. Graduates demonstrate flexibility and the growth mindset to adapt and thrive in the volatile, uncertain, complex and ambiguous (VUCA) environment. 9. National and Global Responsiveness. Graduates exhibit a deep sense of nationalism as it complements the need to live as part of the global community where diversity is respected. They promote and fulfill various advocacies for human and social development.
COLLEGE GOALS AND OBJECTIVES	The Polytechnic University of the Philippines – Taguig Campus aims to achieve the following goals: 1. Offer curricula which are relevant and responsive to the changing needs of the industry and society; 2. Provide trainings to students that will enable them to become potent instruments to socio-economic development. 3. Prepare students to become productive, creative, innovative, and dynamic in their chosen fields of specialization. 4. Provide state-of-the-arts facilities of learning to optimize student development; 5. Inculcate appropriate values that are necessary to build a humane, disciplined, nationalist, and independent society; 6. Tap potentials of students, faculty, administrative staff and other stakeholders in formulating policies for institutional development; 7. Involve all stakeholders in enhancing programs for student’s faculty and employees’ development; 8. Partner with industry and other research institutions strengthening research capabilities of faculty, employees and students; 9. Facilitate presentation of research outputs in international fora, and their publication in recognized journals; 10. Undertake outreach and research-based extension programs by tapping the expertise and other resources of all stakeholders and, 11. Produce technologies for commercialization of livelihood improvement.

PROGRAM LEARNING OUTCOMES (PLO)	Based on CMO	Alignment to ILOs								
		1	2	3	4	5	6	7	8	9
		Apply knowledge of computing, science, and mathematics appropriate to the discipline.								
	Analyze complex problems, and identify and define the computing requirements appropriate to its solution									
	Identify and analyze user needs and take them into account in the selection, creation, evaluation									

	and administration of computer-based systems.									
	Design, implement, and evaluate computer-based systems, processes, components, or programs to meet desired needs and requirements under various constraints.

DEBUTS AT 1501+

	Integrate IT-based solutions into the user environment effectively.											
	Assist in the creation of an effective IT project plan.											
	Apply knowledge through the use of current techniques, skills, tools and practices necessary for the IT profession											
	Understand best practices and standards and their applications.											
	Function effectively as a member or leader of a development team recognizing the different roles within a team to accomplish a common goal.											
	Communicate effectively with the computing community and with society at large about complex computing activities through logical writing, presentations, and clear instructions.											
	Analyze the local and global impact of computing information technology on individuals, organizations, and society.											
	Understand professional, ethical, legal, security and social issues and responsibilities in the utilization of information technology.											
	Recognize the need for and engage in planning self-learning and improving performance as a foundation for continuing professional development											

COURSE LEARNING OUTCOMES (CLO)		Alignment to PLOs							
		1	2	3	4	5	6	7	8
	Explain the purpose, importance, and characteristics of technical documentation in the IT field.								
	Identify and analyze the audience and purpose to produce user-centered documentation.								
	Apply the principles of clarity, accuracy, and conciseness in technical writing.								

	Use appropriate document structures, styles, and formatting standards (APA, IEEE, or company-specific).								
	Integrate visuals, data, and other media effectively to enhance document usability and comprehension.								
	Utilize digital tools and collaborative platforms in creating, editing, and managing documents.								
	Demonstrate ethical, legal, and professional standards in documentation practices.								
	Produce and present a complete, high-quality technical document that meets industry and academic standards.								

OUTCOMES-BASED TEACHING AND LEARNING PLAN (OBTL PLAN)

Week	Desired Learning Outcomes (DLOs)	Learning Content/Topics	Instructional Delivery Design		Assessment		Alignment to CLOs			
			Face-to-Face	Flexible Teaching and Learning Activities (FLTAs)	Face-to-Face	FLTAs	1	2	3	4
1	- Equip students on the pivotal ideas embedded in the vision, mission, and 10 Pillars of PUP - Gain an overview of the course subject and requirements	- Orientation about PUP Vision, Mission, and 10 Pillars - Overview about the Subject Course and Course Requirements	Present the VMGO, policies, and guidelines on the conduct of Face-to-Face; and of the requirements of the course.		Formative Assessment (Sharing of Learning)		X			
2	- Define technical documentation and its relevance to IT - Describe characteristics and types of technical documents	- Overview of Technical Documentation; Purpose and Importance - Types: User manuals, reports, proposals, guides	- Lecture, discussion - Lecture, sample analysis	- Course orientation, Q&A - Group discussion on real-world examples	- Quiz 1: Introduction to Technical Documentation - Document classification activity	- Poll quiz & group Q&A participation - Live identification quiz				
3	Identify target audience and purpose	Audience analysis, purpose, and tone	Case study activity	Real-time group brainstorming	Group activity output	Audience profiling via breakout groups				

4	• Apply research and data gathering	Research methods, data validation	Lecture, data evaluation	Group consultation	Research activity	Oral sharing of findings				
5	• Apply clarity and accuracy in writing	• Writing principles, 7Cs of writing	• Writing workshop	• Peer-editing and feedback	• Writing exercise	• Peer editing session				
6	• Organize and format documents	• Templates, APA, IEEE style	• Demo using samples	• Real-time formatting activity	• Formatting quiz	• Formatting challenge				
7	• Develop procedural documents	• Steps, instructions, and checklists	• Demo and discussion	• Live collaborative drafting	• Instruction draft	• Group editing of instructions				

8	• Use visuals effectively • Write technical descriptions and definitions	• Charts, graphs, screenshots • Descriptive writing	• Hands-on creation • Lecture & sample review	• Visual critique session • Synchronous peer review	• Visual creation • Description writing	• Live critique & feedback • Group editing exercise				
9	MIDTERM WRITTEN EXAMINATION									
10	• Prepare professional technical reports	• Structure, summaries, appendices	• Lecture	• Consultation & report planning	• Outline submission	• Report planning discussion				
11	• Write proposals and specifications	• Proposal elements, persuasive writing	• Workshop	• Online mentoring	• Proposal draft	• Live consultation				
12	• Create data presentations	• Graphs, tables, visuals	• Demo and analysis	• Data presentation via screen share	• Data visualization report	• Real-time presentation				
13	• Edit and proofread	• Editing tools, proofreading marks	• Editing workshop	• Peer-review session	• Edited draft	• Collaborative editing				
14	• Apply document design principles	• Layout, typography, usability	• Lecture and demo	• Live design critique	• Layout design project	• Real-time feedback				
15	• Produce digital documents	• PDFs, hyperlinks, online docs	• Software demo	• Tool use demonstration	• Digital doc submission	• Tool-based quiz				

16	Collaborate in documentation projects	Collaboration tools, ethics	Group project meeting	Live coordination session	Group report	Team progress sharing				
17	- Present final documentation - Reflect and evaluate documentation process	- Presentation skills - Reflection and evaluation	- Final presentation - Feedback discussion	- Live pitching & defense - Closing reflection session	- Final presentation - Reflection report	- Oral defense & Q&A - Exit interview or feedback				
18	FINAL WRITTEN EXAMINATION <i>(Final Presentation, Practical Exam)</i>									

		Resources and Applying Strategies in Teaching Prose <i>Competency 4:</i> Recognizing Assessment in Teaching Prose	achievement which are consistent with the selected competencies Learning Plan Making according to the English curricula that develops higher order thinking skills of learners through the use of prose and dramatic texts		Quizzes

CLASSROOM POLICY	
FACE-TO-FACE DELIVERY	FLEXIBLE TEACHING AND LEARNING ACTIVITIES (FLTAs)
Please refer to the FLTA policies, except for the stipulation on Attendance. Attendance will be checked during face-to-face sessions.	Students' Responsibilities Students are expected to: a. Take time to read and watch the provided class learning materials. b. Fulfill class requirements such as posting on discussion boards and submitting group presentations. c. Check the status of their submissions and inform the instructor if they are having problems submitting the requirements.

The instructor may not be able to remind all students about their missing/unsubmitted requirements. If at the end of the course students still have missing requirements, the instructor will compute for the final grade without those submissions (They will be graded with 0) and submit the grade. If the final grade is "INC" grade, the student must contact the instructor to decide in completing the course, ASAP.

d. Confer with classmates or the instructor about the discussions during the synchronous sessions that they missed if unable to attend the live sessions. Recordings will be provided but may not be available immediately.

e. Inform the instructor of concerns that may prevent them from fully participating in the class. This includes withdrawal from the course, long term illnesses, personal matters, and others. Teachers will not be able to help you if you don't tell them of these concerns.

Attendance.
We recognize that students have varying access levels to technology and connectivity, which is why for the most part, the course is conducted asynchronously. During synchronous sessions, there will be no checking of attendance. However, everyone is encouraged to participate in these sessions. A recording and/or transcript of synchronous classes will be made available for students who are unable to attend a synchronous session.

Late Submissions.
Deadlines will be set for the submission of course requirements. This allows the instructor sufficient time to review them. It also helps students pace their work. If you experience problems submitting your work on time, please contact the instructor ahead of time. All requirements must be completed to pass the course. Late submissions will not merit deductions but may not receive timely feedback.

Cheating and Plagiarism.
Any work submitted by a student in this course for academic credit will be the student's own work. Any form of academic dishonesty will be fully dealt with according to the stipulations of the PUP Student Handbook.

Participation.
Participation during discussions is greatly encouraged, and students should feel free to ask questions when an idea or lesson is unclear or confusing, especially during synchronous sessions.

Announcements.
Class announcements will be communicated through the class president. Other communication shall always be coursed through university-issued (i.e., official) email accounts. Students must use their PUP student accounts.

Intellectual Property and Copyright.
Original materials created for this online class is covered by university policies on intellectual property. Some (third-party) instructional materials (e.g., YouTube videos) might be under the public domain or are open access, while others (e.g., some assigned readings) might be subject to fair use. All third-party instructional materials will be attributed to their original creators. Electronic copies of the assigned readings are for your private consumption only. Access to the course materials for this class for PUP students will be restricted to only those students registered in this course and will be available for only a

	limited period. Please do not share these materials with anyone elsewhere. The same applies to the recordings of the synchronous sessions.	
COURSE REQUIREMENT/S	GRADING SYSTEM	
Students are expected to actively participate in all class activities, attend regularly, and submit tasks on time. Assessments include quizzes, writing assignments, and a major documentation project that demonstrate understanding of technical writing principles, document design, and ethical communication. Students will use digital tools such as Google Docs or Microsoft Word for collaborative writing and are required to present and defend their final technical document. A digital portfolio containing selected works and reflections must also be submitted at the end of the course. Midterm and final exams will evaluate their overall mastery of concepts and practical application.	Mid Term	Final Term
	Class Standing 70% Exercises/Activities Summative Quizzes Recitation and Attendance Reflection Paper	Class Standing 70% Exercises/Activities Summative Quizzes Recitation and Attendance Reflection Paper
	Midterm Examinations 30%	Final Examinations 30%
	100%	100%
Final Grade = (Midterm Grade + Final Term Grade) / 2
