

COURSE SYLLABUS						
Course Code	ELEC IT-E2	Course Title	IT Elective 2		Course Credit	3
Course Description		This course introduces the principles and practices of Software Quality Assurance (SQA) with emphasis on information security compliance based on ISO/IEC 27001:2022. It focuses on integrating QA processes into the Software Development Life Cycle (SDLC), including secure coding, testing, configuration management, and continuous improvement. Students will perform manual and automated testing, evaluate software quality metrics, and conduct internal audits aligned with international quality and information security standards.				
Pre-Requisites		None	Co-Requisites	None		
VISION		A Leading Comprehensive Polytechnic University in Asia				
MISSION		Advance an inclusive, equitable, and globally relevant polytechnic education towards national development.				
QUALITY POLICY STATEMENT		The Polytechnic University of the Philippines commits to provide inclusive and equitable quality education and promote lifelong learning opportunities for human advancement and social transformation through re-engineered polytechnic academic programs. Toward this end, we, the members of the PUP Community will vigorously and steadfastly endeavor to continuously improve the standard of University services to the satisfaction of our clients through the adoption and continuous review of our Quality Management System.				

**INSTITUTIONAL
LEARNING OUTCOMES
(ILO)**

- As a polytechnic state university, PUP shall develop its students to possess:
1. **Critical and Creative Thinking.** Graduates use their rational and reflective thinking as well as innovative abilities to life situations in order to push boundaries, realize possibilities, and deepen their interdisciplinary, multidisciplinary, and/or transdisciplinary understanding of the world.
 2. **Effective Communication.** Graduates apply the four macro skills in communication (reading, writing, listening, and speaking), through conventional and digital means, and are able to use these skills in solving problems, making decisions, and articulating thoughts when engaging with people in various circumstances.
 3. **Strong Service Orientation.** Graduates exemplify strong commitment to service excellence for the people, the clientele, industry, and other sectors.
 4. **Adept and Responsible Use or Development of Technology.** Graduates demonstrate optimized and responsible use of state- of-the-art technologies of their profession. They possess digital learning abilities, including technical, numerical, and/or technopreneurial skills.
 5. **Passion for Lifelong Learning.** Graduates perform and function in society by taking responsibility in their quest for further improvement through lifelong learning.

	6. Leadership and Organizational Skills. Graduates assume leadership roles and become leading professionals in their respective disciplines by equipping them with appropriate organizational skills. 7. Personal and Professional Ethics. Graduates manifest integrity and adherence to moral and ethical principles in their personal and professional circumstances. 8. Resilience and Agility. Graduates demonstrate flexibility and the growth mindset to adapt and thrive in the volatile, uncertain, complex and ambiguous (VUCA) environment. 9. National and Global Responsiveness. Graduates exhibit a deep sense of nationalism as it complements the need to live as part of the global community where diversity is respected. They promote and fulfill various advocacies for human and social development.
COLLEGE GOALS AND OBJECTIVES	The Polytechnic University of the Philippines – Taguig Campus aims to achieve the following goals: 1. Offer curricula which are relevant and responsive to the changing needs of the industry and society; 2. Provide trainings to students that will enable them to become potent instruments to socio-economic development. 3. Prepare students to become productive, creative, innovative, and dynamic in their chosen fields of specialization. 4. Provide state-of-the-arts facilities of learning to optimize student development; 5. Inculcate appropriate values that are necessary to build a humane, disciplined, nationalist, and independent society; 6. Tap potentials of students, faculty, administrative staff and other stakeholders in formulating policies for institutional development; 7. Involve all stakeholders in enhancing programs for student’s faculty and employees’ development; 8. Partner with industry and other research institutions strengthening research capabilities of faculty, employees and students; 9. Facilitate presentation of research outputs in international fora, and their publication in recognized journals; 10.Undertake outreach and research-based extension programs by tapping the expertise and other resources of all stakeholders and, 11.Produce technologies for commercialization of livelihood improvement.

	Integrate IT-based solutions into the user environment effectively.									
	Assist in the creation of an effective IT project plan.									
	Apply knowledge through the use of current techniques, skills, tools and practices necessary for the IT profession									
	Understand best practices and standards and their applications.									
	Function effectively as a member or leader of a development team recognizing the different roles within a team to accomplish a common goal.									
	Communicate effectively with the computing community and with society at large about complex computing activities through logical writing, presentations, and clear instructions.									
	Analyze the local and global impact of computing information technology on individuals, organizations, and society.									
	Understand professional, ethical, legal, security and social issues and responsibilities in the utilization of information technology.									
	Recognize the need for and engage in planning self-learning and improving performance as a foundation for continuing professional development									

COURSE LEARNING OUTCOMES (CLO)		Alignment to PLOs							
		1	2	3	4	5	6	7	8
	CLO 1: Explain the fundamental principles of software quality assurance (S ensuring information security in line with ISO/IEC 27001 standards.								
	CLO 2: Differentiate ISO standards relevant to QA (ISO 9001, ISO/IEC 270 and apply their concepts to software development processes.

OUTCOMES-BASED TEACHING AND LEARNING PLAN (OBTL PLAN)

Week	Desired Learning Outcomes (DLOs)	Learning Content/Topics	Instructional Delivery Design		Assessment		Alignment to CLOs			
			Face-to-Face	Flexible Teaching and Learning Activities (FLTAs)	Face-to-Face	FLTAs	1	2	3	4
1	- Equip students on the pivotal ideas embedded in the vision, mission, and 10 Pillars of PUP - Gain an overview of the course subject and requirements	- Orientation about PUP Vision, Mission, and 10 Pillars - Overview about the Subject Course and Course Requirements	Present the VMGO, policies, and guidelines on the conduct of Face-to-Face; and of the requirements of the course.		Formative Assessment (Sharing of Learning)		X			
2	Explain the relationship between software quality assurance (SQA) and information security management.	- Overview of ISO/IEC 27001 principles - Relationship between quality assurance and ISMS - CIA Triad (Confidentiality, Integrity, Availability) - PDCA (Plan-Do-Check-Act) model in ISMS	Lecture: QA-ISMS integration	Online Q&A on QA and ISMS connection	Short quiz and reflection journal					

3	Identify applicable ISO standards and controls relevant to software QA and security.	- ISO/IEC 27001: Structure and key clauses - Annex A controls relevant to software and QA (A.5–A.12) - ISO/IEC 9001 vs ISO/IEC 27001 - Mapping quality and security controls	Group case study: ISO control application in QA	Online breakout: Control mapping activity	Group report: “QA Controls in ISO 27001”					
4	Integrate QA activities within the Software Development Life Cycle (SDLC) and secure development practices.	- QA checkpoints in each SDLC phase - Secure SDLC (SSDLC) overview - ISO/IEC 27001: A.14 – Secure system acquisition, development, and maintenance	Lecture: SDLC diagramming and discussion	Online collaboration: “QA roles per SDLC phase”	Worksheet: QA and SDLC mapping					

5	• Differentiate and test SOAP and REST web services using QA tools.	• Web services architecture overview • SOAP vs REST API fundamentals • Tools: Postman and SOAPUI • ISO/IEC 27001 A.12.1 – Operational security in testing environments	Hands-on API testing lab	Online demo using Postman & SOAPUI	Lab exercise and quiz on SOAP vs REST				
6	• Apply software testing methodologies aligned with QA and ISMS.	• Functional vs Non-functional testing • Security testing and vulnerability assessment • ISO/IEC 27001 A.12.6 – Technical vulnerability management	Lab: Conduct manual security testing	Reading: OWASP Testing Guide	Short quiz and practical task				
7	• Design effective and secure test cases.	• Test design techniques (Equivalence Partitioning, Boundary Value, Decision Table) • Risk-based testing • Traceability matrix	Test case design workshop	Self-paced documentation activity	Test case design submission				

8	• Execute test cases, log defects, and manage test results securely using QA tools.	• Test execution process • Defect lifecycle management • ISO/IEC 27001 A.5.12 – Secure logging and audit trails • Jira, TestLink, Zephyr for defect tracking • Writing secure defect reports	Hands-on lab: Execute and log tests in Jira	QA simulation with real-time monitoring	Test Execution Report & Defect Log					
9	MIDTERM WRITTEN EXAMINATION									
10	• Implement automated testing within secure CI/CD environments	• Automation frameworks: Selenium, Jenkins, GitHub Actions • Continuous Testing (CT) and Continuous Integration (CI) • ISO 27001 A.12.1 – Change control and environment security	Guided Selenium scripting	Reading: “CI/CD Security Practices”	Practical: Automated test script submission					
11	• Measure software and security quality using QA metrics.	• QA metrics (Defect density, coverage, reliability) • Security KPIs (Incident rate, compliance level) • Dashboard creation and data visualization	Lecture and metrics workshop	Online discussion of QA data	Quiz: QA Metrics and KPI Interpretation					

12	• Conduct internal QA audits and ensure process compliance	• ISO 27001 Clause 9 – Internal audit • Audit process and checklist • Corrective and preventive actions (CAPA)	Mock internal audit exercise	Online audit readiness drill	Audit report submission					
13	• Implement configuration and version control aligned with ISO/IEC 27001 change management.	• Version control principles • Git/GitHub secure repository management • ISO 27001: A.8.32 – Change management controls	Git lab exercise: branching and merging	Live repo review via GitHub	Lab submission: Version Control Workflow					
14	• Perform software quality and security audits with documentation and feedback.	• QA and security audit procedures • Audit documentation and findings • ISO 27001: Clause 10 – Improvement cycle	Simulation: Conduct QA audit and report findings	Online discussion: Audit reporting best practices	Audit findings report

The instructor may not be able to remind all students about their missing/unsubmitted requirements. If at the end of the course students still have missing requirements, the instructor will compute for the final grade without those submissions (They will be graded with 0) and submit the grade. If the final grade is "INC" grade, the student must contact the instructor to decide in completing the course, ASAP.

d. Confer with classmates or the instructor about the discussions during the synchronous sessions that they missed if unable to attend the live sessions. Recordings will be provided but may not be available immediately.

e. Inform the instructor of concerns that may prevent them from fully participating in the class. This includes withdrawal from the course, long term illnesses, personal matters, and others. Teachers will not be able to help you if you don't tell them of these concerns.

Attendance.

We recognize that students have varying access levels to technology and connectivity, which is why for the most part, the course is conducted asynchronously. During synchronous sessions, there will be no checking of attendance. However, everyone is encouraged to participate in these sessions. A recording and/or transcript of synchronous classes will be made available for students who are unable to attend a synchronous session.

Late Submissions.

Deadlines will be set for the submission of course requirements. This allows the instructor sufficient time to review them. It also helps students pace their work. If you experience problems submitting your work on time, please contact the instructor ahead of time. All requirements must be completed to pass the course. Late submissions will not merit deductions but may not receive timely feedback.

Cheating and Plagiarism.

Any work submitted by a student in this course for academic credit will be the student's own work. Any form of academic dishonesty will be fully dealt with according to the stipulations of the PUP Student Handbook.

dishonesty will be fully dealt with according to the stipulations of the PUP Student Handbook.

Participation.

Participation during discussions is greatly encouraged, and students should feel free to ask questions when an idea or lesson is unclear or confusing, especially during synchronous sessions.

Announcements.

Class announcements will be communicated through the class page or posted through university-issued (i.e., official) email accounts. Students should check their email regularly.

Intellectual Property and Copyright.

Original materials created for this online class is covered by copyright. If you use any (third-party) instructional materials (e.g., YouTube videos) might be subject to copyright while others (e.g., some assigned readings) might be subject to fair use.
