

COURSE SYLLABUS						
Cours e Code	ITEC 201	Course Title	Practicum		Course Credit	6
Course Description		This course develop students practical skills to meet the needs of the industry. It exposes the student to real-world challenges that are hardly found in textbooks and classroom settings. It is a course requirement for a baccalaureate degree which provides an opportunity among students to apply the theories, principles and ideas learned in the academic environment to actual work settings under the guidance and supervision of their training supervisors. It exposes the students to work realities which will ideally hone their skills and prepare them for the “world of work” after college. Attainment of the On-the-Job training program objectives ensures the readiness of the graduates to face the challenges of the industry. Hence, vitl as it is, OJT should be dynamic, technical and managerial skill-centered for the students to effectively grasp the practical learning in the workplace. The students are required to render 500 hours of actual on-the-job training experience.				
Pre-Requisites		INTE 303, INTE 302, COMP 19, and COMP 8	Co-Requisites	None		
VISION		A Leading Comprehensive Polytechnic University in Asia				
MISSION		Advance an inclusive, equitable, and globally relevant polytechnic education towards national development.				
QUALITY POLICY STATEMENT		PUP, with the vision to become A Leading Comprehensive Polytechnic University in Asia, shall continue to advance an inclusive, equitable and globally relevant education and provide excellent service delivery through instruction, research, extension and knowledge production. We, the members of Sintang Paaralan, driven by our guiding principle, “Gagamitin ang Karunungan, Mula sa ‘yo Para sa Bayan,” are committed to produce competent graduates who meet the needs and expectations of the national and international community. PUP shall continuously improve systems and operations by promoting ethical and intellectual standards in response to the evolving educational, scientific, and technological development aligned with the institution’s strategic directions.				

INSTITUTIONAL LEARNING OUTCOMES (ILO)	As a polytechnic state university, PUP shall develop its students to possess: 1. Critical and Creative Thinking. Graduates use their rational and reflective thinking as well as innovative abilities to life situations in order to push boundaries, realize possibilities, and deepen their interdisciplinary, multidisciplinary, and/or transdisciplinary understanding of the world. 2. Effective Communication. Graduates apply the four macro skills in communication (reading, writing, listening, and speaking), through conventional and digital means, and are able to use these skills in solving problems, making decisions, and articulating thoughts when engaging with people in various circumstances. 3. Strong Service Orientation. Graduates exemplify strong commitment to service excellence for the people, the clientele, industry, and other sectors. 4. Adept and Responsible Use or Development of Technology. Graduates demonstrate optimized and responsible use of state- of-the-art technologies of their profession. They possess digital learning abilities, including technical, numerical, and/or technopreneurial skills. 5. Passion for Lifelong Learning. Graduates perform and function in society by taking responsibility in their quest for further improvement through lifelong learning.
---	---

	6. Leadership and Organizational Skills. Graduates assume leadership roles and become leading professionals in their respective disciplines by equipping them with appropriate organizational skills. 7. Personal and Professional Ethics. Graduates manifest integrity and adherence to moral and ethical principles in their personal and professional circumstances. 8. Resilience and Agility. Graduates demonstrate flexibility and the growth mindset to adapt and thrive in the volatile, uncertain, complex and ambiguous (VUCA) environment. 9. National and Global Responsiveness. Graduates exhibit a deep sense of nationalism as it complements the need to live as part of the global community where diversity is respected. They promote and fulfill various advocacies for human and social development.
COLLEGE GOALS AND OBJECTIVES	The Polytechnic University of the Philippines – Taguig Campus aims to achieve the following goals: 1. Offer curricula which are relevant and responsive to the changing needs of the industry and society; 2. Provide trainings to students that will enable them to become potent instruments to socio-economic development. 3. Prepare students to become productive, creative, innovative, and dynamic in their chosen fields of specialization. 4. Provide state-of-the-arts facilities of learning to optimize student development; 5. Inculcate appropriate values that are necessary to build a humane, disciplined, nationalist, and independent society; 6. Tap potentials of students, faculty, administrative staff and other stakeholders in formulating policies for institutional development; 7. Involve all stakeholders in enhancing programs for student’s faculty and employees’ development; 8. Partner with industry and other research institutions strengthening research capabilities of faculty, employees and students; 9. Facilitate presentation of research outputs in international fora, and their publication in recognized journals; 10.Undertake outreach and research-based extension programs by tapping the expertise and other resources of all stakeholders and, 11. Produce technologies for commercialization of livelihood improvement.

PROGRAM LEARNING OUTCOMES	Based on CMO	Alignment to ILOs								
		1	2	3	4	5	6	7	8	9
	1. PLO1 / IT01 – Foundations	X			X					
	Apply knowledge of computing, science, and mathematics appropriate to the IT discipline in analyzing and solving IT-related problems.									

(PLO)	2. PLO2 / IT02 – Standards & Best Practices Explain and use IT best practices, industry standards, and frameworks in the analysis and implementation of solutions.	X			X			X		
	3. PLO3 / IT03 – Problem Analysis Analyze complex problems and determine the computing and information requirements needed to design an appropriate IT solution.	X			X					
	4. PLO4 / IT04 – User Needs Identify and analyze user and stakeholder needs , and consider them in selecting, designing, evaluating, and administering computer-based systems.	X		X						X

	5. PLO5 / IT05 – System Design & Development Design, implement, and evaluate computer-based systems, processes, components, or programs to meet specified requirements under realistic constraints (technical, economic, social, etc.).	X		X		X			
	6. PLO6 / IT06 – Integration into the Environment Integrate IT-based solutions effectively into the organizational and user environment (e.g., existing platforms, policies, workflows).			X	X	X			X
	7. PLO7 / IT07 – Tools & Techniques Use current tools, techniques, skills, and practices necessary for the IT profession (e.g., platforms, frameworks, dev tools, admin tools).				X			X	
	8. PLO8 / IT08 – Teamwork & Leadership Work effectively as a member or leader of a development team , recognizing and performing different roles to accomplish a common goal.		X			X	X		
	9. PLO9 / IT09 – Project Planning Contribute to the planning and management of IT projects , including scope, schedule, resources, and basic risk considerations.	X					X	X	
	10. PLO10 / IT10 – Communication Communicate effectively with the computing community and the broader society about complex computing activities through clear documentation, presentations, and instructions.s.		X						X
	11. PLO11 / IT11 – Impact Analysis Analyze the local and global impact of computing and IT on individuals, organizations, and society, including economic, social, and environmental dimensions.	X		X			X		X
	12. PLO12 / IT12 – Professional & Ethical Responsibility Demonstrate awareness of and adherence to professional, ethical, legal, security, and social responsibilities in the use and management of information technolo			X				X	X

	13. PLO13 / IT13 – Lifelong Learning Recognize the need for, and engage in, self-directed learning and continuous professional development in IT.									X		X	X	X

THE COUNTRY'S 1st POLYTECHNIC

The instructor may not be able to remind all students about their missing/unsubmitted requirements. If at the end of the course students still have missing requirements, the instructor will compute for the final grade without those submissions (They will be graded with 0) and submit the grade. If the final grade is “INC” grade, the student must contact the instructor to decide in completing the course, ASAP.

d. Confer with classmates or the instructor about the discussions during the synchronous sessions that they missed if unable to attend the live sessions. Recordings will be provided but may not be available immediately.

e. Inform the instructor of concerns that may prevent them from fully participating in the class. This includes withdrawal from the course, long term illnesses, personal matters, and others. Teachers will not be able to help you if you don’t tell them of these concerns.

Attendance.
We recognize that students have varying access levels to technology and connectivity, which is why for the most part, the course is conducted asynchronously. During synchronous sessions, there will be no checking of attendance. However, everyone is encouraged to participate in these sessions. A recording and/or transcript of synchronous classes will be made available for students who are unable to attend a synchronous session.

Late Submissions.
Deadlines will be set for the submission of course requirements. This allows the instructor sufficient time to review them. It also helps students pace their work. If you experience problems submitting your work on time, please contact the instructor ahead of time. All requirements must be completed to pass the course. Late submissions will not merit deductions but may not receive timely feedback.

Cheating and Plagiarism.
Any work submitted by a student in this course for academic credit will be the student’s own work. Any form of academic dishonesty will be fully dealt with according to the stipulations of the PUP Student Handbook.

Participation.
Participation during discussions is greatly encouraged, and students should feel free to ask questions when an idea or lesson is unclear or confusing, especially during synchronous sessions.

Announcements.
Class announcements will be communicated through the class president. Other communication shall always be coursed through university-issued (i.e., official) email accounts. Students must use their PUP student accounts.

Intellectual Property and Copyright.
Original materials created for this online class is covered by university policies on intellectual property. Some (third-party) instructional materials (e.g., YouTube videos) might be under the public domain or are open access, while others (e.g., some assigned readings) might be subject to fair use. All third-party instructional materials will be attributed to their original

	creators. Electronic copies of the assigned readings are for your private consumption only. Access to the course materials for this class for PUP students will be restricted to only those students registered in this course and will be available for only a
